

Ai Professional Development for Teachers

Providing educators with the tools and training to integrate Ai into lesson planning, instruction, and collaboration—supporting innovation while protecting instructional quality.

Why Choose Our Training?

We help teachers use Ai to save time and re-imagine Instruction.

These sessions show educators practical, safe, and creative ways to use Ai to enhance planning, communication, and student engagement.

Plan Smarter, Not Harder

- Use Ai to draft and adapt lesson plans in minutes
- Align activities to learning standards and UDL frameworks
- Brainstorm new ways to differentiate instruction

Save Time on Classroom Tasks

- Draft parent emails, newsletters, and announcements
- Generate rubrics, quizzes, and discussion prompts
- Repurpose existing materials for different grade levels or subjects

Personalize Learning & Support Students

- Create scaffolds for diverse learning needs and literacy levels
- Translate content or instructions into multiple languages
- Design supports that meet each learner where they are

Teach & Model Responsible Ai Use

- Check and verify Ai-generated content before sharing
- Discuss bias, ethics, and accuracy with students
- Model transparent, responsible use of Ai in the classroom

Let's Train Your Team
